EDUCATION

University of California, Irvine

Expected Jun 2028

B.S. Informatics, GPA: 3.93

Irvine, CA

Relevant Coursework: Project Management, Database Management, Statistics, Software Engineering & Design, Human-Computer Interaction, Python, Java, Health Informatics, AI Engineering

EXPERIENCE

Technology Risk Consulting Intern

Jun 2026 – Aug 2026

Ernst & Young

Los Angeles, CA

- Identified a manual review bottleneck impacting engagement timelines and shipped an AI agent (Microsoft Copilot Studio) to summarize evidence sets, cutting review time per engagement from 10 hours to 2 hours
- Defined requirements and acceptance criteria for evidence validation across 20+ controls, 9 applications, and 4 control domains for two \$15B+ clients, ensuring deliverables met stakeholder standards under scrutiny
- Coordinated across engineering, audit, and client teams to run 15+ stakeholder walkthroughs, tracking open requests and surfacing blockers to keep delivery on schedule

IT Technician

Jul 2025 – Present

UC Irvine Samueli School of Engineering Computing Unit

Irvine, CA

- Identified a recurring workflow gap between staff needs and existing tools; scoped and shipped a Python GUI tool that automated data entry and reporting, enabling self-service for end users
- Analyzed 15-20+ weekly support tickets to surface root causes over symptoms, turning findings into prioritization recommendations that reduced repeat incidents
- Owned data quality and integrity for a system of record spanning 200+ device and user accounts, balancing operational accuracy with usability for stakeholders

Learning Assistant

Aug 2025 – Jan 2026

UC Irvine Donald Bren School of ICS

Irvine, CA

- Synthesized qualitative and quantitative feedback from 200+ students per quarter into recurring themes, informing instructor decisions on curriculum and course adjustments
- Guided students through core CS concepts, including recursion and data structures, in 1:1 and group settings, adapting explanations to individual learning gaps

PROJECTS

CloseSure | *React, Tailwind CSS, JavaScript*

- Led requirements discovery through 10 stakeholder interviews, prioritizing findings into a documented feature set that shaped the product roadmap for first-time homebuyers
- Directed a 3-person team through requirements validation, running 20-user acceptance tests and analyzing completion data to confirm product-market fit (100% task completion, 9/10 satisfaction)

Consistency | *React, TypeScript, Supabase, Vercel*

- Interviewed 10 beginner weightlifters to identify gaps in progress tracking, uncovering that manual 1RM-based recalculation in spreadsheets was frequently skipped, causing inconsistent programming
- Translated user research into product requirements and shipped an MVP (Figma to production via Claude Code) that auto-generates weekly weight targets, replacing the skipped manual step

Personal Finance Dashboard | *Python, Streamlit, SQLite, Pandas*

- Scoped a 4-module product from 10+ user interviews, prioritizing features around real transaction patterns and spending pain points uncovered in discovery
- Shipped data pipelines processing 100+ transactions over 4 months, using trend analysis and threshold alerts to cut user food spending by 50%

SKILLS

Product: User Research, Requirements Definition, Roadmapping, A/B Testing, PRDs, Prioritization

Tools: Jira, Confluence, Figma, Git, Snagit, Microsoft Office Suite

Data & Analytics: SQL, Python, Pandas, NumPy, Excel, Matplotlib

Programming: Java, C++, JavaScript, HTML/CSS; Frameworks: React, Streamlit
